CS 154 - Introduction to Automata and Complexity Theory

Spring Quarter, 2000

How are we doing?

We are interesting in getting some feedback about this class, while there is still some time to make "course corrections." Please answer the following questions and return this sheet anonymously to the instructor (after class or in the mail-box). You may also respond by email to `rajeev@cs.stanford.edu`.

a). On a scale of 0 (easiest possible) to 10 (hardest possible), how difficult has this course been for you so far?

b). How much time per week do you put in on:
Reading? Homeworks?

c). Please describe any problems you have faced with the course so far (clarity of lectures, level of details in proofs, homework assignments. help from TAs, etc.). Also, do you have any suggestions for improving this course?
