Final Exam: The final examination will be held 12:15--3:15 pm on Friday, June 5 at Gates B01 and Gates B03. We have reserved two rooms so as to provide alternate seating. Please distribute yourselves into the two rooms appropriately.

The finals will be open-book and open-notes exam, i.e., you will be allowed to consult the text-book, class handouts, and your class notes. You are not permitted to refer to any other material during the exam.

Exam Syllabus: We will cover the entire course in the exam, with about 2/3 of the questions being on the material not already covered by the midterm.

Homework 7 Deadline and Solutions: The last homework for this class (Homework 7) will be due on Tuesday June 2. Normally, we would allow people using the late credit on this homework to turn in the homework by Firday June 5. However, the final exam is on June 5. We would like to distribute the sample solutions for Homework 7 by June 4. For these reasons, we will make the late submission deadline for Homework 7 to be 4pm on Thursday June 4. Please take note and plan accordingly.

SCPD Students: We hope that most of the local SCPD students will come to campus for the finals. This will help in having their exams graded along with the rest of the class in a timely fashion. If you are not planning to come to campus for the final exam, please send email to cs154-staff@cs.stanford.edu so that we can make alternate arrangements.

Review Session and Office Hours: There will be a review session for the final exam on Wednesday, June 3 from 11:00–11:50am in Gates B01 (televised). This should also be available on Stanford Online.

We will maintain the usual office hours schedule until June 4, the day before the finals.

Sample Exam and Solutions: We have prepared a sample final exam, with solutions, to help you practice and prepare for the actual final exam. Since the sample is over 10 pages long, we will not be handing it out in hard-copy from. Instead, we will place it as a handout on the class web-page for you to download. Note that there will be two versions of the handout: one without solutions, and another including the sample solutions.
